(Do you mind if I record the audio of this meeting?)

0. Introduction

Hi all!

1. What has been done?

- almost all chapters have been filled in!
- continued with the code to get some geodata on the canvas, which was a success:
 - COPC files can now be loaded and visualized

2. Where are we currently?

- Background & related works is too long!
- Editorial work still incomplete (sources, images, diagrams, abbreviations)
- 'strange analysis chapter' -> can't put my word on it, but the analysis chapter needs some changes
- Missing parts in the implementation and analysis chapters, working on that

3. Questions

- I really wish to know where I'm at:
 - How is the narrative?
 - What should really be in order for the P4?
 - Are there any crucial parts missing?
 - Are there any parts of the thesis 'unacceptable'?
- I find it weird to write the analysis chapter.
 - I can only give written comments, I have no data.
- I built a 'personal reflection' this week, should I include that in the final meeting

4. What needs to be done for next meeting?

- All editorial work finished
 - no missing images

- no missing sources
 - no sentences stopping randomly
 - no missing abbreviations
- The studies referred to have to be conducted.
- The remaining empty chapters 5.2 and 6.2 should be filled

5. Administrative:

- P4 all set?
- Hugo?

6. Next Meeting
